CONFIDENTIAL INSTRUCTIONS

This document gives details of how to prepare for and administer the practical exam.

The information in this document and the identity of any materials supplied by Cambridge International are confidential and must NOT reach candidates either directly or indirectly.

The supervisor must complete the report at the end of this document and return it with the scripts.

If you have any queries regarding these confidential instructions, contact Cambridge International stating the centre number, the syllabus and component number and the nature of the query.

email info@cambridgeinternational.org
phone +44 1223 553554
fax +44 1223 553558

This syllabus is regulated for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.
General information about practical exams

Centres must follow the guidance on science practical exams given in the Cambridge Handbook.

Safety

Supervisors must follow national and local regulations relating to safety and first aid.

Only those procedures described in the question paper should be attempted.

Supervisors must inform candidates that materials and apparatus used in the exam should be treated with caution. Suitable eye protection should be used where necessary.

The following hazard codes are used in these confidential instructions, where relevant:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>corrosive</td>
</tr>
<tr>
<td>HH</td>
<td>health hazard</td>
</tr>
<tr>
<td>F</td>
<td>flammable</td>
</tr>
<tr>
<td>N</td>
<td>hazardous to the aquatic environment</td>
</tr>
<tr>
<td>MH</td>
<td>moderate hazard</td>
</tr>
<tr>
<td>T</td>
<td>acutely toxic</td>
</tr>
<tr>
<td>O</td>
<td>oxidising</td>
</tr>
</tbody>
</table>

Hazard data sheets relating to substances used in this exam should be available from your chemical supplier.

Before the exam

- The packets containing the question papers must not be opened before the exam.
- It is assumed that standard school laboratory facilities, as indicated in the Guide to Planning Practical Science, will be available.
- Spare materials and apparatus for the tasks set must be available for candidates, if required.

During the exam

- It must be made clear to candidates at the start of the exam that they may request spare materials and apparatus for the tasks set.
- Where specified, the supervisor must perform the experiments and record the results as instructed. This must be done out of sight of the candidates, using the same materials and apparatus as the candidates.
- Any assistance provided to candidates must be recorded in the supervisor’s report.
- If any materials or apparatus need to be replaced, for example, in the event of breakage or loss, this must be recorded in the supervisor’s report.

After the exam

- The supervisor must complete a report for each practical session held and each laboratory used.
- Each packet of scripts returned to Cambridge International must contain the following items:
  - the scripts of the candidates specified on the bar code label provided
  - the supervisor’s results relevant to these candidates
  - the supervisor’s reports relevant to these candidates
  - seating plans for each practical session, referring to each candidate by candidate number
  - the attendance register.
Specific information for this practical exam

During the exam, the supervisor (NOT the invigilator) must do the experiments in Questions 1 and 2 and record the results on a spare copy of the question paper, clearly labelled ‘supervisor’s results’.

Materials and apparatus for Question 1

Each candidate will require the following materials and apparatus. Labels do not need to include concentrations.

[C][N]  •  100 cm\(^3\) of copper(II) sulfate, CuSO\(_4\), of concentration 0.5 mol/dm\(^3\) labelled aqueous copper(II) sulfate

[F]  •  5 g of magnesium powder in a dry stoppered tube labelled magnesium powder

[F][N]  •  5 g of zinc powder in a dry stoppered tube labelled zinc powder
  •  5 g of zinc granules labelled zinc granules

The magnesium powder, zinc powder and zinc granules should be newly purchased.
The zinc granules should be small.

•  access to water and distilled water
•  25 cm\(^3\) measuring cylinder
•  250 cm\(^3\) beaker
•  polystyrene cup (a cardboard cup may be used as an alternative)
•  stop-clock or timer which can measure to an accuracy of 1 s
•  thermometer, –10 °C to +110 °C at 1 °C graduations
During the exam, the supervisor (NOT the invigilator) must do the experiments in Questions 1 and 2 and record the results on a spare copy of the question paper, clearly labelled ‘supervisor’s results’.

Materials and apparatus for Question 2

Each candidate will require the following materials and apparatus. Labels do not need to include concentrations.

- 1.0 g of aluminium potassium sulfate-12-water (potassium alum), $\text{Al}_2\text{K(SO}_4\text{)}_2\cdot12\text{H}_2\text{O}$, in a stoppered tube labelled solid M

[H][N] blue cobalt(II) chloride paper
- aqueous barium nitrate of sufficient concentration to give a positive sulfate test
[C] aqueous nitric acid of concentration 1.0 mol dm$^{-3}$
[C] aqueous sodium hydroxide of concentration 1.0 mol dm$^{-3}$
[MH][N] aqueous ammonia of concentration 1.0 mol dm$^{-3}$
- distilled water
- 10 cm$^3$ measuring cylinder
- splints
- Bunsen burner and means to light it
- rack of test-tubes
- hard-glass test-tube
- boiling tube
- stopper to fit boiling tube
- test-tube holder
- teat pipettes
- spatula
Supervisor’s report

Syllabus and component number  
Centre number  
Centre name  
Time of the practical session  
Laboratory name/number  

Give details of any difficulties experienced by the centre or by candidates (include the relevant candidate names and candidate numbers).

You must include:

- any difficulties experienced by the centre in the preparation of materials
- any difficulties experienced by candidates, e.g. due to faulty materials or apparatus
- any specific assistance given to candidates.
Declaration

1 Each packet that I am returning to Cambridge International contains the following items:

☐ the scripts of the candidates specified on the bar code label provided
☐ the supervisor’s results relevant to these candidates
☐ the supervisor’s reports relevant to these candidates
☐ seating plans for each practical session, referring to each candidate by candidate number
☐ the attendance register

2 Where the practical exam has taken place in more than one practical session, I have clearly labelled the supervisor’s results, supervisor’s reports and seating plans with the time and laboratory name/number for each practical session.

3 I have included details of difficulties relating to each practical session experienced by the centre or by candidates.

4 I have reported any other adverse circumstances affecting candidates, e.g. illness, bereavement or temporary injury, directly to Cambridge International on a special consideration form.
