This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners’ meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates’ scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.
Type of mark

In general:

(i) ‘M’ marks are awarded for any correct method applied to the appropriate numbers, even though a numerical error may be involved.
   a) Once earned they cannot be lost.
   b) They are earned for a numerical statement which is usually explicit as regards the quantity to be found.
   c) e.g., the use of a wrong formula, wrong trigonometrical ratio or misapplication of ‘Pythagoras’ is wrong method.

(ii) ‘A’ marks are awarded for a numerically correct stage, for a correct result or for an answer lying within a specified range.
   a) They are given only if the relevant ‘M’ mark has been earned.
   b) They are not given for a correct result following an error in working.

(iii) ‘B’ marks are independent of method and are usually awarded for an accurate result or statement.

(iv) In graph or drawing questions some marks may carry a letter (e.g. G4 for drawing the graph, Q1 for quality, L3 for drawing loci) to make their identification easier.

Abbreviations which may be used in mark schemes or in comments on scripts:

A.G.  Answer given
b.o.d.  Benefit of doubt
c.a.o.  Correct answer only
(in)dep  (In) dependent
Ex.Q.  Extra question
  Follow through
  Further error made
I.S.W.  Ignore subsequent working
M.R.  Misread
o.e.  Or equivalent
O.W.  Omission of essential working
P.A.  Premature approximation
S.C.  Special case
s.o.i.  Seen or implied
S.O.S.  See other solution
t.&e.  Trial and error
W.W.  Without working (i.e. answer only seen)
W.W.W.  Without wrong working
(£) or (°)  Condone the omission of the £ or degree sign etc.
1 (a) \[ \pi \times (\text{fig } 7)^2 \times 15 \text{ or figs } 23 \]
\[ \pi \times 0.07^2 \times 15 \text{ or } \pi^2 \times 1500 \]
0.23 to 0.231

M1
A1
A1 [3]
SC1 for 0.92 → 0.924

(b) (i) \[ \cos T \bar{P} A = \frac{15}{23} \]
49.29 to 49.3
A1 [2]

\begin{align*}
\text{(ii)} & \quad \frac{12}{\sin T} = \frac{15}{\sin 37} \\
\sin T & = \frac{12\sin 37}{15} = (28.7 - 29) \\
B \hat{P} T & = 114 - 114.22
\end{align*}
M1
M1
A1 [3]

\begin{align*}
\text{(iii)} & \quad \tan A = \frac{15}{23} \\
A & = 33 \text{ to } 33.12
\end{align*}
M1
A1 [2]
SC1 for 56.8 to 56.9
